

HOW TO FIND

Equivalent Citation Table is a useful tool to know the **parallel citations** of cases published in different journals. Presently, no Equivalent Citation Table is available which may provide equivalent citation of the cases which are reported in **Supreme Court Reports**. In order to facilitate and enhance the use of official publication of the Court namely “**Supreme Court Reports**” this “**Equivalent Citation Table**” has been compiled by the **Supreme Court Judges Library**.

From this Table Equivalent Citations of **Supreme Court Reports** of any case reported in the four major Law Journals namely, **Supreme Court Cases, AIR (SC), JT and SCALE** can be obtained.

This Equivalent Citation Table is in four volumes:-

- 1 Volume 1 - AIR (SC) = SCR = SCC = JT = SCALE
- 2 Volume 2 - SCC = SCR = AIR (SC) = JT = SCALE
- 3 Volume 3 - JT = SCR = SCC = AIR (SC) = SCALE
- 4 Volume 4 - SCALE = SCR = SCC = AIR (SC) = JT

All the Citations have been arranged in chronological sequence, in ascending order of pagination. For example, if an equivalent citation of **1950 AIR 211** is to be obtained, one has to see in the year 1950 in volume 1 and then in the ascending order of pagination, he will find that equivalent citation of this in SCR as **1950 SCR 519**. For reaching the page from which citations of a particular year begins, help of “**Index**” may be taken.

This table contains the equivalent citations **from 1950 till date** and will be updated from time to time. An “**Index**” indicating page number, from which citations of a particular year begins, has also been provided in each volume.
